Electrical Courses Guide 2021/2022

## About Training In Electrical

Training in Electrical is a City & Guilds, Logic Certification and EAL approved electrical training provider. We pride ourselves on offering quality electrical training in a friendly environment at an affordable price here at our centre in Nottingham, open 7 days a week.

We offer the industry recognized installation and testing courses required to enter the trade as a qualified electrician.

## Why Choose Training In Electrical?

Whether you are new to the electrical trade or are wishing to further your career, Training in Electrical will support you throughout the whole process.

Our courses are competitively priced and include registration and certification fees, candidate course material, examination fees, and access to tools and materials in our dedicated workshop.

All of our electrical courses are delivered by highly skilled, time-served electrical staff that have an enormous wealth of practical knowledge and qualifications in the Electro-technical industry.

## Online Home Study Courses

Some of our courses are available through our successful home study program.

Independent study can give you the flexibility to organize your studies around your schedule. Many of our students have chosen to study from home or on the move using our tried and proven course material and the City & Guilds SmartScreen service.

Exams and workshops are held throughout the year allowing you to advance at your own pace.

The SmartScreen and online material are available to help you study on the move.

## ENHANCED LEARNING CREDITS / BLUE LIGHT CARD

Training in Electrical are pleased to provide support for armed service leavers claiming their enhanced learning credits. All of our Level 3 courses are eligible and custom course bundles are available to help you retrain as smoothly as possible.

Book an appointment or ask one of our courses advisors for more details.

## Available Courses

---

### Level 3 Installation and Commissioning of Electric Vehicle Charging Equipment

Price: £425

(Inc. VAT & Certification Fees)

Awarding body: City & Guilds

This 2-day course covers the key skills required for the installation, fault finding and inspection and testing of electric vehicle charging points.

This qualification covers the installation of dedicated conductive charging equipment for the charging of pure electric and plug-in hybrid electric road vehicles (PHEV) and includes the extended range of electric vehicles (E-REV). It covers the installation of both AC and DC charging equipment intended for plug-in electric vehicles (PEV) complying with BS EN 61851 and "The Code of Practice for Electric Vehicle Charging Equipment Installations.

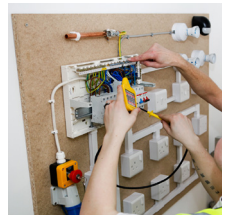

---

### EAL - Level 4 Award in the Design and Verification of Electrical Installations

Price: £995

(Inc. VAT & Certification Fees)

Awarding body: EAL

Having undergone critical changes and further development, we are now offering this brand-new course. Under the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (FHEQ), candidates who successfully complete this course will achieve a Level 4 Award in Higher Education.

It is recommended that all candidates possess a recognised qualification in Inspection & Testing of Electrical Installations and the latest 18th Edition Wiring Regulations (BS7671).

It is also desirable that entrants have completed either the City & Guilds 2365 Level 3 or EAL equivalent qualifications.

## Available Courses

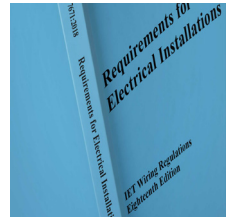

---

### 18th Edition Wiring Regulations 2018 BS7671

Price: £249

(Inc. VAT & Certification Fees)

Awarding body: City & Guilds

The 18th Edition Wiring Regulations BS7671 (2018) course is necessary for all candidates new to the electrical industry, practicing electricians, electrical engineers and domestic electrical installers wishing to operate in the Electrotechnical Industry.

It is an essential course aimed at giving the candidate a thorough understanding of the fully up to date requirements of 18th Edition Wiring Regulations BS 7671:2018.

This short electrical qualification can be completed as home study or our popular 2-day course which is assessed by an open-book exam.

---

### Domestic Electrical Installer & Building Regulations (including Part-P) 10 day package

Price: £1999

(Inc. VAT & Certification Fees)

Awarding body: Logic Certification / City & Guilds

This 2-week (10 day) course is ideal for new entrants seeking to enter the electrical industry and those wishing to work in domestic dwellings. The package includes a Level 2 Domestic Electrical Installer (including Part P Building Regulations), the 18th Edition Wiring Regulations (BS7671) and the City & Guilds (2392) Initial Verification and new installations.

On completion of these qualifications, you will have the knowledge to carry out wiring in domestic properties and to issue electrical test certificates. Candidates will also have the requirements to join an approved Competent Person Scheme such as NAPIT and NICEIC.

## Available Courses

---

### City & Guilds 2365 Diploma in Electrical Installations Level 2 (Buildings & Structures)

Price: £2399  
(Inc. VAT & Certification Fees)

The City & Guilds 2365 (Level 2) Electrical Installation course is the industry recognised entry qualification, which is required prior to progressing onto the 2365 Level 3.

Candidates are required to achieve 4x learning units which include basic electrical Principles & electrical wiring skills which are assessed by way of a hands-on workshop practical assignment.

This 20-week course is available as an evening, weekend or home study package and can be achieved in as little as 12 weeks.

---

### City & Guilds 2365 Diploma in Electrical Installations Level 3 (Buildings & Structures)

Price: £2999  
(Inc. VAT & Certification Fees)

If you are looking to become a qualified electrician and want to work in domestic, commercial and industrial premises the City & Guilds 2365 Level 3 Electrical Installation qualification is now the recognised route.

This technical course builds on the electrical principles gained at Level 2. Candidates are required to achieve several learning outcomes which include, electrical design, renewable technology, inspection and testing of electrical installations, fault finding and advanced electrical principles.

## Available Courses

---

### Portable Appliance Testing (PAT)

Price: £390

(Inc. VAT & Certification Fees)

Awarding body: City & Guilds

The City & Guilds 2377-77 day electrical course has been designed for candidates wishing to carry out inspection and testing of electrical equipment and provide certification. This course is open to any persons with little or no electrical knowledge or experience and is delivered with this in mind. As there is a legal requirement to periodically inspect electrical appliances in the work place it is ideal for people who have to manage and certify electrical equipment.

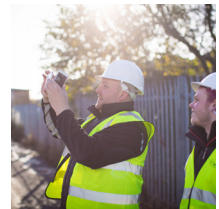

This course will give you the knowledge and hands on experience in how to correctly perform and manage PAT testing using the latest equipment. Completing this course will give you the confidence you require to correctly perform this role.

---

### City & Guilds 2357 NVQ Level 3 in Electrical Installation (Buildings and Structures)

Price: £1750

(Inc. VAT & Certification Fees)

The City & Guilds (2357) NVQ is essential to candidates wishing to obtain a JIB (Joint Industry Board) Gold Card.

Candidates must have completed or working towards the City & Guilds (2365) Level 3 in Electrical Installations.

This NVQ is an online portfolio which the learner is expected to gather real life evidence gained in commercial / industrial locations.

## Available Courses

---

### City & Guilds 2391-52 Initial & Periodic Inspection and Testing Qualification

Price: £975

This City & Guilds 2391-52 is a comprehensive 5 day qualification which will allow the candidate to visually inspect and test both new and existing electrical installations in domestic, commercial and industrial premises.

This course is ideal if you are seeking to progress your electrical career and will allow you to issue both initial verification test certificate and electrical condition reports (ERC) for landlord insurance purposes.

The qualification is assessed by way of an open-book online multiple choice and practical assignment.

# Electrical Installation Practical Workshop

---

Due to popular demand Training in Electrical is now offering an additional 2-day workshop practical course for basic electrical installation work.

If you are working towards a qualification or looking to change careers but have limited practical experience this course is an ideal opportunity to learn valuable skills through demonstrations and hands-on practical exercises.

Throughout the course you will familiarise yourself with different types of containment including PVC and steel conduit, cable tray and trunking, as well as basic wiring, cable selection, terminations and safe isolation. This course comes highly recommended alongside the 2365 Diploma in Electrical Installation and Domestic Electrical Installer's courses.

The cost of the course is £495 inc VAT which includes all tools and materials. Upon completion of the course you will receive a Training in Electrical Certificate for Attendance.

For more information call 01158 228 645.

## What Our Students Say About Us

---

"I was really nervous about attending my T.I.E course but as soon as I arrived the T.I.E staff made me feel more than welcome. The Tutor we had was above all my expectations. Answered any questions that any of us were wondering, and didn't mind having to explain some of the regs more than once if at first one of us didn't understand.

Will definitely be putting in for another course and I fully recommend these guys to anyone either wanting to branch out into electricians or looking to further their electrical skills. Can't wait to get stuck in again with these guys and their courses. Thanks"

Andy Rix

---

"I completed my level 3 Electrical course here. Excellent facilities, friendly tutors and staff. Highly recommended. I plan to do other courses once I save up some more money. Electricians is an excellent trade and TIE will take you all the way."

Paul Witham

---

"What a fantastic place to study and I do not know what I would have done without you guys at Training in Electrical. For all of you wanting to study from home or decided to have a change of career like my self, Training in Electrical is the best place to study.

I am from London and I could not find any organisation which offered studying Electrical qualifications through distance learning and the support I received from all the staff at Training in Electrical was 10/10.

Thank you so much for all your help and support, all of my electrical qualifications will be studied through Training in Electrical."

Kishan

---

"Again another successful course completed with Training and Electrical (NVQ LEVEL 3), support throughout was second to none. Great communication, with Rob on hand at any time to help with the questions you needed help with. Would I recommend this training company? YES! Also great value for money, can not wait to do Inspection and Testing with Training in Electrical."

S Kennedy
